

Don't just reply. Help customers buy.

Fast answers matter, but Smart Sales Desk also asks what a buyer needs, clears doubts with your approved details and guides the next step. Your team stays in charge.

THE PRICE AT A GLANCE

₦100,000

Setup + month one

BEFORE MONTH TWO, CHOOSE ONE

₦120,000

months 2-4 prepaid

₦385,000

months 2-12 prepaid

OR — not both

WHAT YOU GET

● Questions that help sell

It asks about storage, colour and what a phone is for, not just “Yes, available.” Fast replies use prices and facts your shop approves.

● One helpful check-in

If a buyer goes quiet without buying, one suitable follow-up may be sent while their 24-hour WhatsApp window is open, if allowed.

● Reviews after a confirmed sale

A polite review request can be set up after your shop verifies a sale, if you approve it and WhatsApp messaging is permitted.

● Start with what you already have

Send prices, photos and common questions on WhatsApp. Guided sharing takes roughly 30 minutes; connecting, approval and testing may take longer.

● Your people stay in charge

Managers and sales staff check stock and payment; your social-media team keeps bringing in buyers. Staff confirm and hold a last unit before payment.

HOW PAYMENT WORKS

₦100,000 covers setup and month one. Before month two, pay ₦120,000 upfront for months 2-4 OR ₦385,000 upfront for months 2-12. The latter totals ₦485,000 for year one. The short choice totals ₦220,000 through month four. Later renewal, year-two terms and provider charges are agreed separately. No standalone pay-monthly option.

ISCALID
SMART SALES DESK

How Smart Sales Desk works

The fuller explanation behind the short offer.

A SALES CONVERSATION

It asks the next useful question: for a phone, that might be storage, colour or whether it is for work or personal use.

It answers using the prices, product details and policies your shop approves, and clears the buyer's doubts. It does not guess live stock or payment.

If the buyer goes quiet, one suitable check-in may be sent before the 24-hour window after their latest message closes, when allowed. It stops after a sale, opt-out or staff takeover.

EASY TO START · HUMAN CONTROL

Send your price list, photos, delivery terms and chat examples on WhatsApp. We guide the information-sharing in roughly 30 minutes—no new dashboard to learn.

We help connect the business number, test and seek your approval. Meta approval and testing can take longer than the intake. We never ask for OTPs on WhatsApp.

Managers and sellers verify stock, hold a last unit before payment and check payment receipt. Your social-media team keeps doing its work.

THE FULL PAYMENT BREAKDOWN

₦100,000

At the start: setup and month one together.

₦120,000

Before month two: months 2–4, prepaid.

₦385,000

OR before month two: months 2–12, prepaid.

The eleven-month choice totals ₦485,000 for year one. The short choice totals ₦220,000 through month four. These are alternatives, not two payments to add together. Month-five terms for the short choice, year-two pricing, provider charges and usage terms are agreed separately. Neither option is a standalone monthly-pay plan.

After a confirmed sale, a review request may be set up if you approve it and WhatsApp permits the message.
